

Axel Lasne

Verification engineer

Personal Info

Email axel.lasne@estaca.eu

Phone +33 (0)6.49.63.36.39

Address werftstraße 11, Frankfurt 60327,
Frankfurt am Main, Germany

Skills

CANoe/CANape
Python
Test script development
System integration testing
Functional testing
Stress testing
Solidworks
Matlab/Simulink
C++
JavaScript
Ansys

Languages

French - C2 Spanish - B1
English - C1 German - A1

Hobby/Interest

- Swimming
- Flying 130 hours accumulated
- Mechanics
- Travel
- Fascinated with airplanes, cars, and the history of aeronautics
- Enthusiastic about astronomy

Certificates

Aeronautical engineering master degree
TOEIC 925/990
Californian driver license
Private Pilot License
French driver license

Personnality traits

DRIVEN &
ENERGETIC

VISIONARY
THINKER

OPEN TO
NEW
EXPERIENCES

HIGHLY
CONSCIENTIOUS

OUTGOING
& PERSONABLE

Aerospace Systems Engineer specialized in propulsion and embedded software validation, with hands-on experience in system integration, track testing, and simulation modeling across international projects.

Work History

12/2025
- Present

Verification Engineer (Hardware in the Loop)

Avilus, Munich

- Conducted HIL (Hardware-in-the-Loop) bench testing and real-time simulation to validate embedded systems under representative flight-like operating conditions.
- Designed and created test cases covering functional and edge-case scenarios, following defined test procedures.
- Collected test data and performed compliance analysis between expected requirements and actual results
- Delivered certification packages, including "fit for flight" sign-off documentation.
- Managed test campaign planning and scheduling across cross-functional teams.
- Debugged and resolved technical issues identified during bench and simulation testing.

03/2024

- 11/2025

System Test Engineer

T&S (Technology and Strategy), Frankfurt

- Validate vehicle systems and configure them to support advanced software functionalities.
- Conduct real-world track testing aligned with European automotive standards, including Euro NCAP protocols.
- Document detailed test reports, manage bug tracking tickets, and drive software optimization —personally contributing to 33% of all resolved tickets within the team.
- Initiated the project and led the growth of the team by over 400%, currently coordinating a group of 10 colleagues and managing the vehicle fleet.
- Collaborated directly with OEMs to enhance technical partnerships through joint testing and feedback loops.
- Designed and implemented Python scripts to automate tasks such as log capture and software flashing, improving operational efficiency by 50% within six months.

03/2023

- 11/2023

Engineering Research Intern

ETS (Higher School of Technology - Industrial Engineering),
Montreal/Quebec

- Analyzed consumption patterns of a General Electric engine in relation to component wear, using aerothermodynamics equations with a deviation of less than 5% from real-world data.
- Applied CAE simulation tools and MATLAB for data engineering, model validation, and performance analysis.
- Developed and implemented a deterioration model to accurately forecast long-term engine fuel consumption.
- Authored a detailed technical report summarizing test results for presentation at a PhD-level conference.

09/2021

- 09/2022

Manufacturing Engineer Intern

Centauri Aircraft Corporation, San Francisco/USA

- Contributed to composite airframe construction, aircraft maintenance, and development and construction of production tools
- Assisted in sourcing and procurement logistics, supplier research, and inventory management
- Trained employees and participated in aircraft certification with the FAA
- Executed management duties and independently managed various work streams.

05/2021

- 09/2021

Project Management and Quality Engineer Intern

Mecachrome, Amboise

- Updated and created convergence plans for projects
- Supported and participated in the deployment of Advanced Product Quality Planning (APQP) for the Airbus NLGB A220 project
- Organized and facilitated a Lean Office mode workshop

Education

08/2017

- 03/2024

Aeronautical Engineering, Specialization in Propulsion Systems and Onboard Energies, Ms.Eng.

ESTACA (École Supérieure des Techniques Aéronautiques et de
Construction Automobile), France
